

Java Foundations

Exercises for: Arrays in Java

Problem: Day of Week

- Enter a **day number** [1...7] and print the **day name** (in English) or "Invalid day!"

```
String[] days = { "Monday", "Tuesday", "Wednesday",  
"Thursday", "Friday", "Saturday", "Sunday" };  
int day = Integer.parseInt(sc.nextLine());  
if (day >= 1 && day <= 7)  
    System.out.println(days[day - 1]);  
else  
    System.out.println("Invalid day!");
```

The first day in our array is on index 0, not 1.

Problem: Reverse an Array of Integers

- Read an array of integers (**n** lines of integers), **reverse** it and print its elements on a single line, space-separated:

3
10
20
30

30 20 10

4
-1
20
99
5

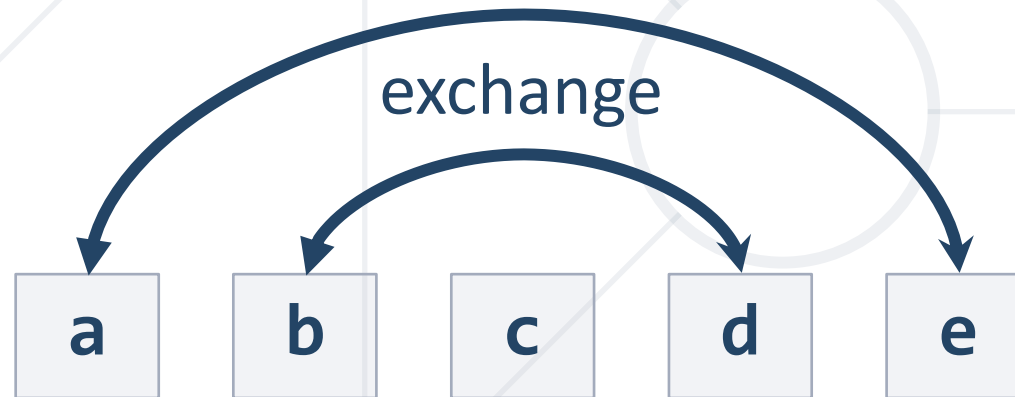

5 99 20 -1

Problem: Reverse Array of Strings

- Read an array of strings (space separated values), reverse it and print its elements:

- Reversing array elements:

Problem: Even and Odd Subtraction

- Read an array of integers
- Sum all even and odd numbers
- Find the difference
- Examples:

1 2 3 4 5 6 → 3

2 4 6 8 10 → 30

3 5 7 9 11 → -35

2 2 2 2 2 2 → 12
